Forecast for Monday 07 Oct 2024

Weather: Cloudy with any lingering outbreaks of rain from overnight soon clearing. A bright day with sunny spells and scattered showers follows, the odd one heavy with a chance of thunder. A more organised band of heavy thundery showers, and squally winds spreading north into the evening.

Chance of cloud-free hill tops above 600m: 30% improving to 70% during the morning. Falling again to 40% during the evening.

Low cloud and visibility: Cloud obscuring some summits above 500m during the morning, but slowly lifting and breaking. Cloud returning to 500m during the evening. Visibility mainly good during the day but occasionally poor in any showers, especially during the evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling chilly on the tops, especially when exposed to the breeze, or if caught in a shower. These showers could be thundery, so worth having a plan for if these occur. Planning an early descent also worthwhile, as very poor weather could develop as the squally band of rain moves though during the evening, perhaps isolated sudden gusts 30-40mph.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Mon 07 Oct 2024	10.6mm	10.6mm	10.6mm

Forecast for Tuesday 08 Oct 2024

Weather: Clear spells and showers through the early hours of Tuesday. These continuing for much of the day, with bright spells and further heavy showers. These becoming frequent with hail and thunder possible by the afternoon.

Maximum wind: Southerly 10-15mph gusts 20-30mph, mainly near showers.

Chance of cloud-free hill tops 600m: 30% overnight then 60% from dawn onward

Low cloud and visibility: Cloud obscuring hills above 500m at first, but clearing by dawn. Further periods with cloud obscuring views possible above 500m during the day, mainly associated with any heavy showers. Generally good visibility but poor in heavy showers.

Temperature: **Valleys:** Plus 11 Celsius rising to Plus 16 Celsius.
At 600m: Plus 9 Celsius rising to Plus 12 Celsius.
Freezing level: Above summits.
